

Transition Newent
NEXT STEPS

**Be involved in planning our
way forward for 2010 and beyond**

**on Saturday morning 7th November
at Newent School 9.30-1.00**

Transition Newent has achieved a tremendous amount in the last 18 months, thanks to everyone who has been involved in any way, through attending our meetings and films, taking part in the workshops, organising events, or being there to lend a helping hand.

It's a good time now for us to take stock together, to learn from what we have done so far, and to plan our way forward. If you are interested in any of the many local implications of climate change and increasing energy costs, and you would like to share your thoughts and hear those of others on how we can best move Transition Newent on in 2010, then join us in this workshop.

The workshop will be an opportunity for us all to,

- identify what has worked well and been of value from what we have done so far**
- develop sound guidelines to help us decide on and organise our future activities and events**
- form common interest groups to plan for the coming 12 months and beyond.**

We hope you will join us at the workshop and help create a more sustainable and resilient community in Newent and the surrounding district.
